EDUCATION

Karadeniz Technical University

M.Sc. in Software Engineering

Trabzon, Türkiye

Sep. 2026 – Present

Karadeniz Technical University

Bachelor of Engineering in Software Engineering

Trabzon, Türkiye

Sep. 2022 – Jun. 2026

EXPERIENCE

Backend & AI Engineering Intern

Perapole

Aug. 2025 – Present

İstanbul, Türkiye

- Developed scalable backend services and RESTful APIs using Python, FastAPI, and PostgreSQL.
- Built and optimized LLM-powered AI applications using the OpenAI API and AI agent architectures.
- Designed and implemented Retrieval-Augmented Generation (RAG) pipelines to improve response quality for AI assistants.
- Developed intelligent AI agents capable of automating business workflows and interacting with external services.
- Implemented asynchronous background processing with Celery for long-running tasks such as AI inference, notifications, and scheduled jobs.
- Containerized backend services using Docker and Docker Compose.
- Implemented real-time communication using WebSockets.

Software Developer Intern

Stoneity

Jun. 2024 – Aug. 2024

İstanbul, Türkiye

- Developed backend components using ASP.NET Core and C#.
- Built and maintained REST APIs integrated with relational databases.
- Fixed bugs, improved application performance, and refactored legacy code.
- Collaborated with team members using Git and Agile methodologies.

PROJECTS

Stock Price Prediction Using LSTM | *Python, TensorFlow, Keras, Pandas, FRED API*

2026

- Developed an LSTM-based deep learning model to predict stock prices using historical market data.
- Combined technical indicators with macroeconomic data from Yahoo Finance and the FRED API to improve forecasting performance.
- Built an end-to-end machine learning pipeline including data preprocessing, feature engineering, model training, and evaluation.
- Evaluated model performance using RMSE, MAE, R^2 , and MAPE metrics.

Real-Time E-Auction Platform | *FastAPI, Next.js, PostgreSQL, Redis, Docker, WebSocket*

2025

- Designed and developed a full-stack real-time auction platform using FastAPI and Next.js.
- Implemented JWT-based authentication, RESTful APIs, and role-based authorization.
- Built WebSocket-based real-time bidding with Redis-backed communication.
- Containerized the application using Docker and PostgreSQL for deployment consistency.

TECHNICAL SKILLS

Languages: Python, Java, C#, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Technologies: FastAPI, Django, ASP.NET Core, React, Next.js, Tailwind CSS, REST APIs, WebSockets, Celery

AI & Machine Learning: OpenAI API, Retrieval-Augmented Generation (RAG), TensorFlow, Keras, Pandas, NumPy

Databases: PostgreSQL, MongoDB, Redis

Developer Tools: Git, Docker

LANGUAGES

English: Upper Intermediate (B2)
